

# Online Portal Technology

## Now Optimised for Mobile

Mobile portals give document access for employees and clients on the move.

InterSoftware's new mobile friendly online portal technology means that recruitment agency employees and clients can now log in to a special zone via a web browser to view and download a variety of documents. The portal can be branded with colour schemes and logos of choice.

It works like an app and is designed to be viewed by a wide variety of mobile devices – from iPads and iPhones to androids.

### QUICK FACTS

- Download payslips and P60's
- Create new timesheets
- Input timesheet information

# Online Portal Technology

Now Optimised for Mobile

Streamline and impress  
Save time and money

Employees can input, view and download essential job related information when on the move, clients can check and authorise workers information and even download invoices wherever they are. It's designed to be easy to navigate and simple to use and will streamline processes for all.

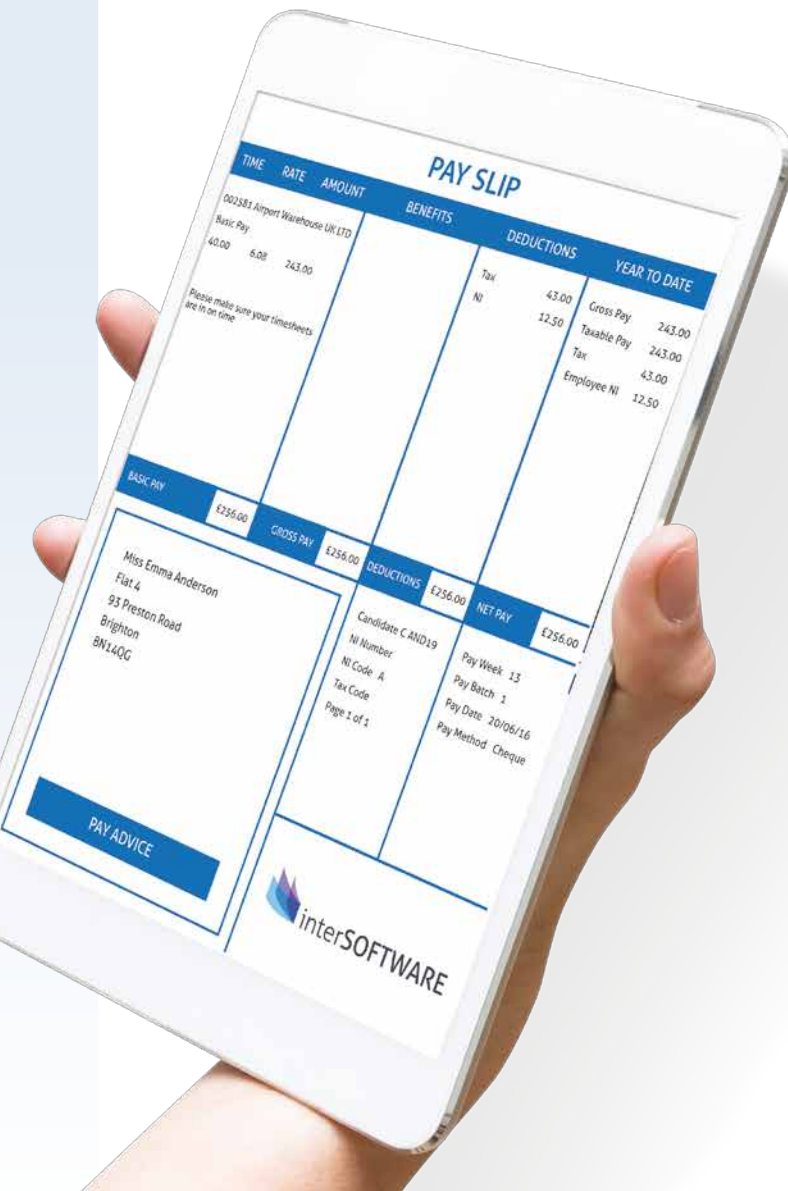

Workers can view and print all their payslips online and download P60's. Timesheet hours can be entered by either the employee or client and authorised online Timesheet images or any other electronic file associated to the timesheet can be uploaded. Workers can log information about when they are available or unavailable for work – invaluable information for efficiently filling jobs.

All timesheets and associated timesheet files are automatically attached to a PDF invoice that can be made available for download via the portal. Once the timesheet hours are input and authorised online, the timesheets within enterpriSe are updated in real-time - saving the need for double entry.

Agencies can save a lot of time and energy through not having to email vast numbers of timesheets, payslips and invoices or fill in timesheets. The technology also eliminates the potential problem of emailed documents not being received and streamlines the back office function. Timesheets can also be created from scratch with drop down lists of employees, clients and contracts. This is particularly useful for internal agency users working at on-site locations or for payroll bureaux.

Mobile portals give employees a good feeling knowing they are in control of their working time as well as impressing clients with an efficient online mobile service which gives them real-time information.

InterSoftware's mobile portal technology can be installed on a web hosted service or your own server and is fully integrated with enterpriSe back office software.
